SUCCESSFUL AD CONSTRUCTION FOR SUBMITTED ADS

- Create document to dimensions of ad space purchased.
 - Set the color space to CMYK. Any color used in ad must be CMYK. Change RGB images to CMYK before placing in the document or ad. Any photograph for use in an ad needs to be A) the highest resolution possible, B) submitted as a .jpg or .jpeg file and C) be set to CMYK.
 - Use logos and other images in EPS format, or size TIF, PDF, or JPEG images to fill the layout at 100% while preserving resolution of 300-400 dpi.
 - Don't nest one EPS within another.
 - Be sure high resolution images, artwork and fonts are available when the file is created. Link or embed images and fonts when the file is saved for publication.
 - Do not simply apply style attributes to plain fonts, as they will be lost when converting the file for printing. Use fonts that are already bold or italic.
 - Camera-ready art that needs to be scanned must be sharp and printed on high-quality (but not high gloss) paper, at full size or larger than the ad space.
 - Recommended software for ad creation:
 - Adobe Photoshop
 - Adobe Illustrator
 - Adobe InDesign
 - Quark Xpress files need to be converted to PDF files before submission.
 - We are unable to accept PageMaker, Corel Draw, Microsoft Publisher, PowerPoint, or Print Shop files.
 - File formats should be saved as TIF, EPS, or PDF. TIF and PDF at 300-400 dpi.
 - Files of 5MB or less can be sent via-email to: info@chincoteaguechamber.com. If files are larger than 5MB they should be supplied on a CD or DVD **with** a hard copy of the document.
